(54) Title: HIGH CAPACITY ALKALINE CELL UTILIZING CATHODE EXTENDER

Schematic progression of Discharge voltages of anode and cathode in Current Art
Anode / Primary Cathode < 1

(57) Abstract: An electrochemical cell is provided that includes a container, a cathode and anode disposed in the container, and a separator disposed between the anode and cathode. The cell further includes an extender either included in or separate from the cathode. An agent is further provided that interacts with soluble ionic species generated in the cathode to prevent the migration of the species to the anode.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
